

Galactix Solutions: Remote Work & Expense Reimbursement Policy

1. Overview

Galactix Solutions operates on a hybrid-first operational posture. This policy clarifies remote working protocols, mandatory connectivity speeds, and structural criteria governing business-related financial expense reimbursements.

2. Core Working Hours and Availability

To ensure robust cross-functional collaboration between engineering, product, and client deployment teams, all core team members must be contactable during standardized operational windows, regardless of physical location.

- **Standard Core Windows:** 10:00 AM to 4:00 PM local time zone.
- **Connectivity Mandate:** Remote workspaces must feature a stable broadband connection with minimum metrics of **50 Mbps download** and **20 Mbps upload** speeds.
- **VPN Protocol:** Accessing corporate cloud instances or staging codebases requires routing traffic through the secure corporate Gateway VPN at all times.

3. Home Office Equipment Allowance

Upon onboarding or initiating a long-term remote work arrangement, full-time personnel are eligible for a one-time remote workspace hardware allowance to cultivate an ergonomic environment.

Category	Eligible Items	Maximum Cap
Ergonomic Support	Approved task chairs, standing desk conversions, lumbar rests.	\$350 USD (or equivalent)
Peripherals	External monitors (up to 2), mechanical keyboards, trackpads, high-definition webcams.	\$400 USD (or equivalent)
Connectivity Subsidy	Monthly broadband internet invoice contribution.	Up to \$40 USD / month

Reimbursement Timeline Matrix: Expense reports, including structural line-item itemized receipts, must be filed via the internal accounting ledger portal within **30 calendar days** of purchase. Belated submissions outside this explicit window are automatically voided.

4. Travel & Client Entertainment Reimbursements

Travel executed for verified client site deployments or internal engineering summits must be pre-authorized by an operating Department Head. Lodging bookings default to standard business-class accommodations. Meal expenses incurred during verified business travel are capped at a per diem rate of \$75 USD per day, requiring itemized digital receipts for verification.

5. Misuse of Funds

Submitting falsified expense entries, duplicate receipts, or routing personal non-work expenditures into corporate channels constitutes explicit financial misconduct and is subject to disciplinary interventions.
